

Professional autonomous starter with integrated charger for starting all vehicles equipped with 12 V batteries.

A high-performance stand-alone starter

Equipped with a «**high performance**» lead battery (in start-up: 830A at 1V/c and 3100A at battery peak), the Gyspack PRO 900 is ideal for starting up light vehicles, vans, tractors and trucks.

Ideal for onsite interventions

- ✓ With its small size and 15kg weight, it is **easily transportable on site and without effort.**
- ✓ **1.80 m of cables** for optimal user comfort.

For safe use

- ✓ Protection against polarities inversion thanks to an audible warning device and an indicator light.
- ✓ equipped with a fuse to protect vehicles against overvoltage, short circuits and avoid sparks when connecting the clamps
- ✓ Equipped with a 300 A fuse protecting the system by case of misuse.

Complete unsupervised charging

- ✓ Thanks to its integrated automatic charger (6 A - curve 7-step intelligent charging), the Gyspack PRO 900 recharges 100% from the mains, unattended, even when permanently connected.
- ✓ Visualization of the state of charge thanks to three LEDs.

Memory backup function

- ✓ 1 cigarette lighter socket for holding or saving vehicle memories (15 A fuse) when changing batteries.

A protected cover

- ✓ The GYSPACK PRO 900 is equipped with corner pads. They protect the cover from impacts when working in demanding environments (on site or in the workshop).

Intelligent charging curve: 7 steps

- 100% automatic charging
- Extends the life and performance of the internal battery
